An Unwise Move-

We called attention editorially a few days ago to the fact that the presidents of the various savings institutions in Brooklyp and New York city had decided to require persons calling for their deposits to them. The savings institutions undoubtedly had the right thus to decline to pay out money except after due and legal notice. It was because, however, we doubted the policy of thus alarming desitors that we called attention to the matter. Of course, then, we were not surprised to learn, as we did on Monday, nat at all of the savings banks in both Brooklyn and New York on that day an unusual number of depositors applied for their money. They applied just as soon as they heard that they could not get their money without having given the otice required by the laws or rules of the savings institutions. If the presidents of he savings banks in the two cities named had gone on as they had done up to Saturday last, and said nothing as to how and lanta (then depositors were to be paid, the probability is that there would have been no run on those institutions.

It is to be hoped in the interest of the people of the whole country that this unwise action under consideration will not result in a local panie. Yes, we consider the same that it would not be. Then I asked of all of the northern men who they would prefer for the next President. They decided in favor of General Grant. Then I proposed that we organize a "Grant club," which was declined—this a year and more before the nomination and when General Grant was thought to be a Demoquestion? A Geary Law in France.

France has a new law which provides that every foreigner who settles in that country must first procure a permit from the authorities of the town or city where he proposes to settle, and that foreigners already in France must take out such a permit in thirty days. Foreigners now send out of France, it is estimated, \$35,-500,000 annually. The French law is the Grany law in effect.
